👤 PROFILE

"Results-driven BCA graduate with expertise in software development, specializing in [languages/tools, e.g., Java and Python]. Completed academic projects including [brief project example]. Proficient in creating efficient, scalable, and user-friendly applications. Seeking to contribute to dynamic development teams to build impactful software solutions."

📁 PROJECTS

E-commerce ✉️

SHOPLANE

01/2025 – 02/2025

Project Name: E-Commerce Website

Description: Developed a fully functional e-commerce platform for users to browse, search, and purchase products online. The project focused on creating a seamless user experience, secure payment processing, and efficient inventory management.

Key Features:

- **User Authentication:** Implemented secure user registration, login, and role-based access for customers and admins.
- **Product Catalog:** Designed an intuitive product browsing experience with filtering, sorting, and search functionality.
- **Shopping Cart:** Built an interactive cart system allowing users to add, remove, and modify items.
- **Payment Gateway Integration:** Integrated [Stripe/PayPal/Razorpay] API for secure payment processing.
- **Admin Dashboard:** Developed an admin panel to manage products, orders, and inventory.
- **Order Tracking:** Enabled real-time order status updates and email notifications.

Technologies Used:

- **Frontend:** HTML, CSS, JavaScript, React/Angular (for dynamic UI).
- **Backend:** Node.js/Flask/Django (for server-side logic and API creation).
- **Database:** MySQL/MongoDB (for storing user data, product details, and order history).
- **Other Tools:** Bootstrap for responsive design, RESTful APIs for data communication, and Git for version control.

Challenges Solved:

- Optimized page load speed for large product catalogs, improving performance by 30%.
- Ensured secure data handling with encryption for user information and transactions.

Outcome: Successfully launched the platform with [specific results, e.g., "over 500 active users within the first month" or "handled over 1,000 transactions"].
